

### **Property Description**

The accommodation benefits from gas fired central heating, double glazing, a welcoming entrance hall, spacious lounge, well equipped kitchen and a bright conservatory overlooking the rear garden. There are also two double bedrooms and a modern shower room, making the property perfectly suited to a variety of buyers including downsizers, professionals, or retirees. Outside to the front, a long private driveway offers off-road parking for 3–4 vehicles, leading to a detached single garage. The rear garden is fully enclosed and wonderfully private,

Total area: approx. 74.1 sq. metres (797.2 sq. feet)

### Rules on letting this property

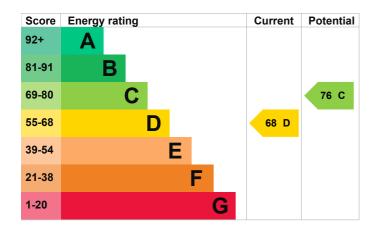

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## **Energy rating and score**

This property's energy rating is D. It has the potential to be C.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

#### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, filled cavity	Good
Roof	Pitched, 150 mm loft insulation	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer and room thermostat	Average
Hot water	From main system	Good
Lighting	Good lighting efficiency	Good
Floor	Suspended, no insulation (assumed)	N/A
Air tightness	(not tested)	N/A
Secondary heating	None	N/A

#### Primary energy use

The primary energy use for this property per year is 239 kilowatt hours per square metre (kWh/m2).

#### **Smart meters**

This property had smart meters for gas and electricity when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

Find out about using your smart meter (https://www.smartenergygb.org/using-your-smart-meter)

# How this affects your energy bills

An average household would need to spend £920 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £95 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2025** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

#### **Heating this property**

Estimated energy needed in this property is:

- 7,343 kWh per year for heating
- 2,403 kWh per year for hot water

Impact on the environment	This property produces	2.4 tonnes of CO2
This property's environmental impact rating is C. It has the potential to be C.	This property's potential production	2.0 tonnes of CO2
Proportion got a rating from A (host) to C (worst) on	You could improve this prope	orty's CO2 amigaiona by

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

#### **Carbon emissions**

An average household produces

6 tonnes of CO2

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

Step	Typical installation cost	Typical yearly saving
1. Floor insulation (suspended floor)	£5,000 - £10,000	£94
2. Solar photovoltaic panels	£8,000 - £10,000	£189
