Services

The main property has septic tank drainage, oil fired central heating along with UPVC double glazing and inset solar panels positioned on the roof feeding the property's electricity. The solar panels are complimented by a Solic200 by Earthwise which diverts any spare power to hot water storage before it goes to the grid.

Addendum One

The current vendors would like it to be known that when they purchased the property they were made aware several redundant mine shafts on the land which do not affect the day-to-day usage.

Addendum Two

In the past consideration has been made, due to the near vicinity of a transformer to install a solar panel bank on the far South West facing slope to generate extra income.

Addendum Three

The agents are advised that the main residence underwent a scheme of redevelopment six years ago. Works included, a full electrical rewire, new boiler and central heating system, new UPVC double glazed windows and a new roof. Two new bathrooms and the kitchen were also installed

Services

The agents have not tested any of the appliances listed in the particulars.
