## THE LAND

4.7 acres of pasture with potential to be split into two fields. Good access to the land is available from the road on the northern boundary.

The land appears on the whole as though it may benefit from more efficient grazing and closer management. An escalated rent may be considered on the basis the land is brought back to a good standard.

The land is classified as grade 3/4 on the Agricultural Land Classification Map for the South West Region and is primarily described as "Freely draining slightly acid loamy soils".

Further investigation may be required by any prospective Tenant as to the land being stockproof. This is at the discretion of the prospective Tenant. Should you wish to complete further fencing works using relevant grants, this would be welcomed by the Landlord but any costs attributable to this shall be borne by the Tenant.

## SERVICES

We are unaware of any services being available to either lot of land. Any prospective Tenant would need to make their own arrangements for any services required.
