SERVICES

Mains electricity, water and drainage are connected. Heating by combination of Vanguard programmable electric radiators and a wood burning stove. As will be seen from the Energy Performance Certificate, the walls have been insulated to help with u values and double glazing has been fitted. The heat recovery unit expels warm damp air from the house and replaced it with fresh air from the outside. Incoming air is heated by the expeled air to within 95% efficiency helping reduce heating costs. The system monitors the air constantly and adjusts air flow and filters out any irritants such as pollen.
