This map displays nearby coal mine entrances and their classifications.

Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

Maps

Conservation Areas

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

Nearby Conservation Areas

- | | |
|----|-------------------------|
| 1 | Hinckley - Druid Street |
| 2 | Hinckley, Hollycroft |
| 3 | Hinckley - Town Centre |
| 4 | Burbage |
| 5 | Barwell A |
| 6 | Barwell B |
| 7 | Aston Flamville |
| 8 | Stoke Golding |
| 9 | Higham on the Hill |
| 10 | Earl Shilton |

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

-  Barwell Ward
-  St. Nicolas Ward
-  Stanton and Flamville Ward
-  Earl Shilton Ward

This map displays the noise levels from nearby network rail and HS1 railway routes that affect this property...

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

5		75.0+ dB	■
4		70.0-74.9 dB	■
3		65.0-69.9 dB	■
2		60.0-64.9 dB	■
1		55.0-59.9 dB	■

Flood Risk

Rivers & Seas - Flood Risk

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Chance of flooding to the following depths at this property:

Flood Risk

Rivers & Seas - Climate Change

This map shows the future chance of flooding from rivers and / or the sea **between 2036 and 2069**, taking into account flood defences and their condition. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

-  Power Pylons
-  Communication Masts

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

The data indicates the level of noise according to strategic noise sources across all traffic routes. This indicates a 25 house annual average noise level with separate weightings for the evening and the night periods.

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB

Martin & Co | Hinckley

Martin & Co is a national network of independently-owned letting and estate agents. Each of these businesses is committed to simplifying your property journey, using our expertise and experience to get you where you need to go, without any fuss.

We take time to understand your goals, empowering you to make informed choices about your next steps.

Having started as lettings specialists, we're nationally recognised as market-leading lettings experts. Over the years, we've continued to evolve, developing into residential sales and investments.

With more than 30 years' experience of delivering exceptional customer service and innovation, you'll have confidence in your move when you work with your local Martin & Co agent.

Testimonial 1

Martin & co were great for me in the purchase of my home. Janet in particular was amazing and really went above and beyond in getting my purchase done in time to beat the rise in stamp duty. Completed for me inside 6 weeks of the original listing. Highly recommend.

Testimonial 2

Definitely recommend Martin and Co in Hinckley. I sold my flat through them. Service second to none. Excellent communication especially Jan. Thank you very much.

Testimonial 3

Currently purchasing through Martin and Co and Mark and Jan have both been amazing, really helpful, full communication at all times with fast responses and very friendly which makes the process much easier. Would recommend!

Testimonial 4

Fantastic service when purchasing a property. Friendly staff and went the extra mile during tricky negotiations also very efficient on moving day. Will use them again.
