# Mullions 36 High Street, Salford, Bristol, BS31 3EJ

Mullions is a delightful detached period village house built chiefly in stone with a tiled roof named no doubt after its characterful mullion windows. The house has a good deal of character having been converted originally from three cottages into one dwelling during the 1960's and in the same ownership since.

The property is ready to move into but offers further potential for updating. It features generous room sizes throughout. On the ground floor there is a spacious entrance porch which leads to a large reception hall with an open tread staircase rising to first floor, there are three good size reception rooms with a study to the rear in a single storey extension. The kitchen is appointed with a range of shaker style units with built in appliances and in addition there is a shower room. The first floor has four bedrooms, two with wash basins together with a good size family bathroom.

On the outside the property enjoys a very pleasant situation in the heart of the village Conservation Area on the corner at the junction of High Street and The Batch opposite St Mary's Church. The characterful High Street comprises mainly picturesque stone built cottages with easy access to the Bristol-Bath cycle way, several local pubs and attractive walks along the River Avon. The centre of the village on the A4 is within walking distance which offers a range of day to day amenities and excellent transport links to Bristol and Bath.

There are good size gardens to both the front and rear with that to the rear being southerly facing while the driveway leads through double gates from The Batch and provides off street parking at the rear of the property.

Salford is an excellent strategic location between the cities of Bristol and Bath offering a range of village amenities and excellent local schools, both the village primary school and Wellsway at Keynsham. The cities of Bristol and Bath are within easy reach by road and public transport.

In fuller detail the accommodation comprises (all measurements are approximate):
