LOT 1 (shaded red on the site plan)

Lot 1 comprises a two-bedroom farmhouse of brick construction, rendered externally and situated underneath a slate roof. The Property has been unoccupied for a number of years and now requires comprehensive renovation or redevelopment.

Accessed via a double gate on Main Street, Lot 1 also includes a range of traditional brick-built barns, former agricultural buildings, stores and other dilapidated structures, including a substantial range of former cart sheds. Collectively, the buildings offer a unique conversion and development opportunity (subject to the necessary planning consents) for a self-builder, developer or small-scale housebuilder seeking to create a residential scheme in the heart of this attractive village.

The Property is set within grounds extending to approximately 2.50 acres, as identified edged red on the Site Plan, providing ample space for landscaping and ancillary uses.

Planning History

The principle of development of Lot 1 has previously been established under a granted planning application (19/00477/FUL) for the 'erection of side and rear extensions to the existing farmhouse, conversion of barns/outbuildings to form two dwellings with open-fronted cart shed for garaging and create new access'. It is, therefore, considered that the barns could lend themselves to residential conversion, subject to obtaining the necessary consents.

Services

Lot 1 has access to mains water, electricity, gas and sewerage connections.

The Soil Survey of England and Wales identifies the land as being from the 'Romney' association, with their characteristics described as 'deep stoneless, permeable, calcareous, coarse and fine, silty soils, with some calcareous, clayey soils' and 'as suitable for growing sugar beet, potatoes, cereals, some field vegetables and horticultural crops'.
