Energy Efficiency

This property has been constructed to the highest energy efficiency standards, meaning energy bills and carbon emissions will be significantly reduced.
There is no mains gas connected, with heat and hot water supplied by an air source heat pump which is linked to solar panels.
There is also a Mechanical Ventilation with Heat Recovery. This is a continuous, whole-building ventilation system that extracts stale, moist air from wet rooms (like kitchens and bathrooms) while simultaneously supplying fresh, filtered outdoor air to living spaces, recycling up to 95% of the outgoing heat in the process.
