## **Description**

In total the land extends to 15.53 acres (6.28 ha) and is split into 8.35 acres of woodland and 7.17 acres of permanent grassland with a grass track around the perimeter of the land. The woodland comprises a number of mature oak, elm and poplar trees.

The land can be accessed through a good sized double gateway to the south and this is the only access into the land. There are two ditches, one of which runs from north to south and another running west to east.

The southern boundary of the land is bordered with wooden post fencing while the eastern boundary comprises mature hedging. There is a narrow hedge on the northern boundary and the western boundary is adjacent to mature woodland trees. The western boundary is bordered by the River Wang.

The land is within Flood Zones 3 and 1. The area of woodland is within Flood Zone 3, with a high probability of flooding. The majority of the grassland is within Flood Zone 1 with a low probability of flooding.

There are no buildings erected on the land.

The land is classified as Grade 3 on the DEFRA 1:250,000 Series Agricultural Land Classification Map and is of the 1025 (Mendham) Soil Association which is described as *'deep peat soils associated with clayey over sandy soils, in part very acid. High groundwater levels. Risk of flooding.'*
