Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

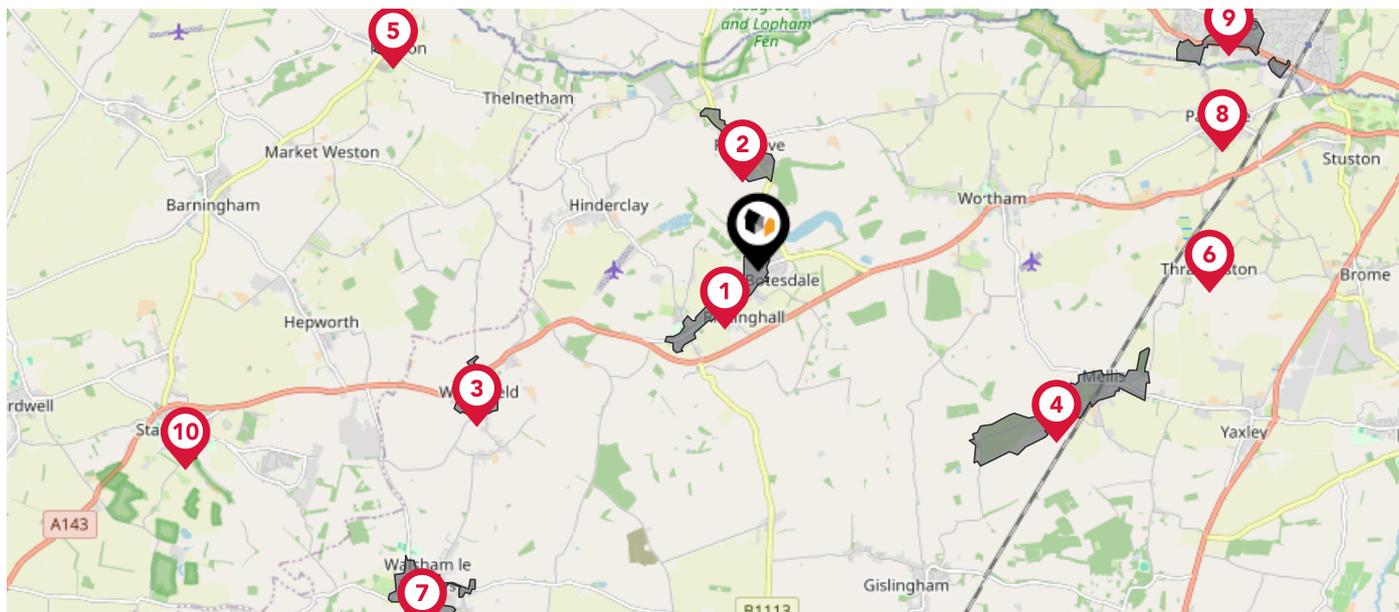

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

4		70.0-74.9 dB	■

It was a pleasure doing business with the Attleborough branch. Kept to every promise made and acted really fast. Made a stressful time far less stressful.

We asked Whittley Parish Diss to carry out a house valuation for us. Alex Parish came to do the job - he was kind, considerate and professional. The process was thorough but yet quick and easy for us. We couldn't ask for more - many thanks.

The whole team at Whittley Parish were first class from first introduction to final sale. With lots of estate agents in the Long Stratton area, this is the only one you need to know. Excellent would highly recommend.
