Key Features

- Ideal starter home
- Mid-Terraced home with parking
- South-facing garden
- 10 Year NHBC Warranty
- Solar panels fitted as standard
- Open Plan Kitchen/Dining room
- Lobby with cloakroom space great for muddy boots or muddy paws
- Bathroom with Shower over the Bath

The Brahms is a brilliant starter home, an ideal choice for first time buyers who are looking to take the first step onto the property ladder.

Off the hallway you'll find a spacious lounge, with plenty of room to relax in after a busy day. An open plan kitchen/dining room is accessible via the lounge. There's plenty of surface and storage space, which you can never have enough of. You'll also find access to your garden through a rear door. This really is a brilliant space for all your social get-togethers. The downstairs cloakroom is a great addition too, especially when you have guests. There's also a practical storage area which is handy for hiding away the less glamorous parts of your home.

The first floor is home to two good sized double bedrooms, as well as a family bathroom. If you're looking to work from home, one of the bedrooms could comfortably double up as a home office, making The Brahms an extremely flexible and adaptable home.

EPC: A rating.

Estimated Completion Date: Jul 26 - Sept 26

Total Internal Area: 82 sq. m. 880 sq. ft.

Predicted Energy Assessment

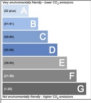

088 M - Strives

Dwelling type: House, Mid-Terrace
Date of assessment: 09/11/2024
Produced by: Michael Jenkins
Total floor area: 65.41 m²
DRN:

This document is a Predicted Energy Assessment for properties registered when they are constructed. It includes a predicted energy rating which might not represent the final energy rating of the property on completion. Once the property is completed, this rating will be updated and an official Energy Performance Certificate will be created for the property. This will include more detailed information about the energy performance of the completed property.

The energy performance has been assessed using the Government approved SAP 10 methodology and is stated in terms of the energy use per square metre of floor area. The energy efficiency is based on fuel costs and the environmental impact is based on carbon dioxide (CO₂) emissions.

Energy Efficiency Rating		Environmental Impact (CO ₂) Rating	
 <p>Best A B C D E F G Worst</p>	<p>01</p>	 <p>Best A B C D E F G Worst</p>	<p>02</p>
<p>England</p> <p>EU Directive 2002/91/EC</p>		<p>England</p> <p>EU Directive 2002/91/EC</p>	

The energy efficiency rating is a measure of the overall efficiency of a house. The lower the rating the more energy it needs to heat the house to keep the inside the house to be. The higher the rating the less impact it has on the environment.
