DESCRIPTION

Linacres is a ring-fenced upland farm, complete with approximately 118.10 ha (291.83 ac) of land, a 4-bedroom stone built farmhouse and a well-equipped steading, comprising of both modern and traditional buildings.

The sale offers an opportunity to acquire an established North Tyne upland farm which historically carried approximately 550 ewes and 30-40 suckler cows. Noted for the quality of stock produced, Linacres is regarded as one of the foremost livestock farms in the area.

The property has also served as a base for the pre-training of racehorses as well as the training of point to pointers. The infrastructure for such remains and as such the sale offers opportunities for traditional farming and also diversification possibilities, be it equestrian use or due to nature of the traditional buildings, conversions into holiday lets or additional dwellings.

The Farmhouse

Approached via private driveway the farmhouse benefits from a prominent position within the holding. There is a separation between the modern buildings and the house ensuring the everyday workings of the farm are distinct to that of the residential element whilst the traditional buildings are attached, allowing the prospect of an extension to the main dwelling or offering scope for development.

Built from traditional stone and under a slate roof, the house benefits from four double bedrooms and two bathrooms on the first floor, with one being ensuite.

On the ground floor, the back door and everyday entrance leads from a porch to a utility/boot room, from here and accessible via a corridor there is a kitchen, a sitting room and a dining/living room. The front door opens out to a private parking area with a large lawned garden.

The kitchen; typical of any farmhouse is the hub of the house, with fitted units and an oil-fired aga providing both heat and character. The sitting room/snug is accessible from the kitchen and via an open arch, which lends itself to open plan and modern living. Benefiting from dual aspect windows, the room is light and spacious. More formal living and/or a quieter room for relaxing can be found in the living/dining room, which again benefits from plenty of natural light and a woodburning stove.

The house is double glazed throughout, with central heating via a biomass wood boiler, fueled by logs rather than chip/pellets; a ready supply of timber on the property ensures efficiency and self-sustainability. Further self-sufficiency is provided for by the private water supply and an array of solar panels; these supply electric to the grid with a monetary payment back as a result. Hot water is provided for via the boiler but also in

the summer months via the solar panels. Drainage is to a private septic tank.

The Steading

Linacres steading encompasses both the new and old, with three modern livestock buildings, a range of semi modern buildings and a range of traditional buildings.

The primary modern buildings are well sized and accessible. They are all steel framed with concrete panels to sides, wooden Yorkshire boarding and sheet roofs. Two are open fronted ensuring excellent ventilation and ease of animal feeding.

The traditional buildings are made of traditional stone under slate roofs. Currently they are used for storage, informal animal housing and stabling. Their nature suggests that subject to obtaining the necessary consents that they would convert offering scope for diversification and/or an extension to the main dwelling.

The secondary modern buildings, include a range of both steel and timber framed buildings. They are ideal for their current use and provide excellent animal housing and management facilities.

Equestrian facilities on the farm include stables, lunge pit and a horse walker, all are used regularly.

Cattle handling facilities, the horse walker and the Monarch loose boxes are “fixtures” and can be removed depending on interest.

The Land

Sitting in a ring fence of (118.10 ha) 291.83 acres, there is approximately 268.24 acres of permanent pasture and circa 11 acres of woodland, the remainder being steading area and a pond.

The farm benefits from 58 acres of mowable grass land which lies immediately adjacent to the steading and/or is within easy reach of it. It forms the productive heart of the farm and is capable of producing quality fodder. The remaining grass land comprises of useful and well apportioned grazing land, with two larger areas of “fell” land, which is again good grazing ground. This land is ideal for the summering and wintering of large numbers of livestock, allowing the heart of the farm to be rested and/or cropped when necessary. In short, the farm is ideally laid out for livestock farming with its history a testament to this.

The woodland on the farm provides excellent shelter, whilst also providing an ideal of source of timber to fuel the farmhouse boiler. Additional shelter can be found via a series of natural ravines and gulleys, that shield the various streams and watercourse that run through the farm.

The farms boundaries both internal and external are stockproof and in the main they are in good condition and consist of post and wire fences and/or dry-stone walls.

The land is watered via a natural supply be it via watercourses or troughs, with the troughs serviced by a private supply.

The land ranges from a high of 201m above sea level to a low of 168m, with the house/sitting at 168m.

The nature of the land, its history and its renowned capabilities show that the holding presents an ideal opportunity for a purchaser to quickly establish a commercially viable agricultural business from the farm. Furthermore, the recent decrease in stock numbers have shown that the land offers clear scope to capitalize on the environmental nature of the farm, be it amenity or monetary.

Equestrian

In recent years, the stables have been utilized as a pretraining yard by a number of noted racehorse trainers. Whilst much of this lies in the capabilities of the handler, the infrastructure at Linacres undoubtedly helped; light and airy stables, a horse walker, and a lunge pit all played a significant part in the horses' education and fitness.

The infrastructure, much which are of fittings, will be available if required and as they present an ideal opportunity for any equestrians who may wish to establish an equine facility.

ENVIRONMENTAL SCHEMES

The land is currently entered into both a Mid Tier Stewardship agreement and a Higher Tier (woodland) Stewardship agreement, with an annual income generated of approximately £14,000 per year. These agreements terminate on 31/12/2028, they can be transferred and/or terminated subject to agreement.

If transferred, the MT and HT stewardship payments will be apportioned from the date of completion to the end of the scheme year. The buyer will give an undertaking to abide by the scheme rules for that period, and/or until the agreement is transferred if applicable. The costs of transferring or terminating the agreements will be borne by the purchaser being £400 plus VAT.

There is an active Sustainable Farming Incentive agreement on the farm, this is non transferrable and will be terminated at the appropriate time.

LOCATION

Linacres is located in the county of Northumberland, within its famed National Park, lying approximately 3.4 miles to the north west of the village of Wark. Bellingham is approximately 5.7 miles to the north.

Wark and Bellingham are noted North Tyne villages with an array of local shops, pubs and hotels. Bellingham has a medical surgery, whilst both offer educational facilities. Sitting in the heart of North Tyne they are both popular for day trippers and residents alike with a strong sense of community as a result.

The regions major town of Hexham, lies 16 miles to the south. Hexham offers an extensive range of local shops, as well as national supermarkets, excellent schooling and a range of professional and leisure services. There is a railway station at Hexham as well as access to the A69.

Newcastle upon Tyne is 33 miles to the south east, it provides extensive opportunities be it shopping, services, professional needs, as well catering for any cultural and/or recreational requirements.

In terms of wider connectivity and general transport links, there is public transport available at Wark, train stations at Hexham and Newcastle, excellent road links via the A69, as well as the highly accessible Newcastle International Airport.
