All figures are estimated and buyers are advised to make their own enquiries to confirm the build costs

Viewing Arrangements

Viewings are strictly by appointment and to be accompanied by the agent.

Location

Situated in the city of Southend-On-Sea, Essex and within the desirable location of Canvey Island town. Canvey island sits along the Thames estuary and benefits from local primary schools, High School, Beach, Town Centre and amenities. The scheme benefits from excellent transport connections to Southend, Leigh-on-Sea, Hadleigh, South Benfleet, and Central Canvey Island. Bus connections are conveniently positioned directly outside the site on Canvey Road (A130), offering a clear advantage for both visitors and staff. In addition, a short journey connects the site to Benfleet Station on the C2C

line, providing quick and reliable services into London Fenchurch Street. The design includes off-street parking allocated for staff and visitors, as well as zoned communal garden spaces for residents and with respect to the nearby habitat sites.

Located in Essex, Canvey Island has great transport links via the A13 & A130, leading direct to London, M25 and A12.

Situated just 38 miles East of Central London and 47 minutes away by train to London Fenchurch Street.

Demographics

Census data indicates that Canvey Island has a population of 37,983 and those aged over 65 equated to 25.9% of the population. Castle Point Local Housing Needs Assessment from December 2023 indicates that, Based on the dwelling-led Local Housing Need projection discussed in Chapter 2, the number of over 75s in Castle Point is projected to increase by around 3,500 in the period 2023-2043. As of 2023, there were 12,291 persons aged 75 years or more in Castle Point and there were 561 units of dedicated older person accommodation in the area, almost all of which is in the form of sheltered housing.

Applying a rate of 120 per 1,000 persons to a growth in the population of 3,527 generates a need of 162 over the 20-year period. However, we would suggest that a higher figure is sought because current provision is currently very low. The national average for older person accommodation per 1,000 persons aged 75 years or older is around 120, not 45. Apply a rate of 120 per 1,000 to 3,527 persons yields a need of 423 units of dedicated older person accommodation and that represents a more realistic target for Castle Point.

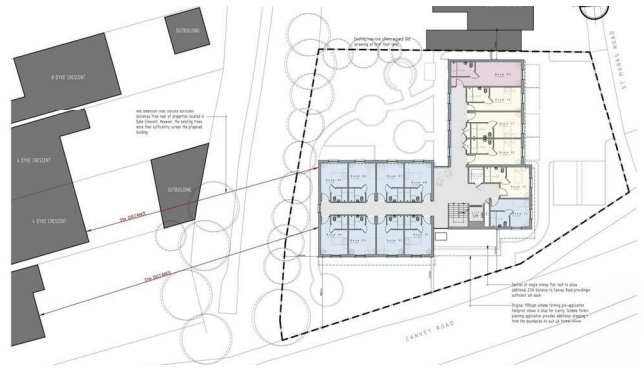

Agents Notes

This is a statement from the pre-app: Conclusion and planning balance.

The application site is allocated for residential development within the adopted Local Plan and the proposal would replace one residential dwelling, when there is a housing need.

This is a statement from the planner:

The site is within a residential area on the 1998 proposals map, there would be a policy presumption in favour of retaining residential uses, or where sites come forward for redevelopment we would want to see them redeveloped for residential use (See last photo).
