# Buying your new home through shared ownership

We understand that getting on the property ladder in the current market is difficult - whether you're saving for a large deposit or stuck in a rental trap and feel it is an impossible task, then shared ownership can help.

## What is shared ownership?

Shared ownership is a popular affordable housing scheme that allows someone to purchase share in a property, paying a mortgage on the share they own and a subsidised rent on the remainder.

Since the purchaser only needs a mortgage based on the share they're purchasing - typically between 10% and 75% of the property's full market value - the deposit required is often much lower than purchasing outright. Likewise, the subsidised rent means it's generally cheaper going through shared ownership rather than privately renting.

At any point, the purchaser can increase their share via 'staircasing', with the ultimate goal being full ownership, however, if the purchaser never wishes to do this, they will always remain as a shared owner.

## How does shared ownership work?

Shared ownership is an affordable house scheme available through housing associations, local councils and private developers.

So, how does shared ownership work? You can apply for a shared ownership mortgage to buy your share or pay using savings, it really depends on what works for you.

If you need a deposit, you'll generally need between 5% and 10% of the share amount, not the full market value.

Based on a full property value of £220,000, this means a 5% deposit for a 40% share (£88,000) may be as little as £4400.

This makes shared ownership much more accessible compared with the costs you'd pay through traditional purchase methods.

You then pay mortgage payments based on your share and below-market value rent on the remainder. As you purchase larger shares of the property through staircasing, your rent goes down and your mortgage payments go up.
