ST MICHAEL'S COTTAGE

An intriguing and substantial period property of immense character in a secluded location on the southern edge of the village having a remarkable open aspect across a wide expanse of unspoilt countryside framed by the Trent Hills in the distance.

St Michaels Cottage is a fine Grade II Listed property believed to date from a time when the Vicar of the Parish earned his stipend through farming land owned by the Church and it is understood that this is one such example in the County.

HOVERINGHAM

A highly regarded and largely undeveloped Conservation village set in the Trent Valley countryside between the main regional centres of Nottingham and Newark on Trent and in close proximity to an extensive range of local amenities in the nearby historic Minster town of Southwell.

The village itself offers the essentials of a traditional English life style having a thriving community centred around the village hall and The Reindeer Inn, a very decent watering hole bordering to the village cricket ground, whilst from the aptly named Boat Lane there is access to unspoilt country walks along the River Trent.

The neighbouring larger village of Lowdham offers a useful range of day-to-day amenities with direct road - rail access into Nottingham centre, whilst in the historic Minster town of Southwell there is a wide range of retail amenities and professional services which in combination with those available in Newark on Trent are becoming more favoured than those in the busier City centre environment.

GARDENS AND GROUNDS

St Michael's Cottage stands in one of the most appealing and sheltered locations in the village bordering to unspoilt Nottinghamshire Greenbelt countryside stretching across to the Trent Hills in the distance – without a residential property being visible across the wide horizon.

The entrance into the property passes between the adjacent St Michael's Farmhouse and the neighbouring former Milking Shed - as marked on plan by a red arrow.

The private gravelled courtyard gives ample parking space concealed from Gonalston Lane, whilst affording level vehicular access into a three-bay garage which has been substantially constructed in a mellow red brick under a natural clay pitched pantile roof having two enclosed vehicle bays and an open centre bay.

An extensive level south facing lawned garden enclosed by handcrafted substantial steel railings creates a very private level garden to the west of the house with the high traditional northern boundary giving effective shelter from the wind.
