

THE **WILDWOOD** ESTATE

TILFORD

AN EXCEPTIONAL RESIDENCE

The Wildwood Estate is an exceptional residential development of five, substantial country homes immersed in a unique, natural setting of 25 acres.

Formerly a specialist nursery, the unspoilt site retains many ancient Rhododendrons and Azaleas displaying spectacular flowers through the spring and summer months, in addition to a wide variety of mature trees.

UNIQUE NATURAL SETTING

The ecology of the site is truly special with a rich diversity of wildlife present within retained boundary habitats. Soft landscaping and estate railings will divide more formal gardens with the natural grassland areas connecting the houses with the countryside on their doorstep.

WARM & LIGHT

aiming to craft an ambiance that is light and bright with a curated palette of rich textures that exude warmth and comfort, while maintaining a neutral canvas.

HERITAGE MEETS CONTEMPORARY

Design steeped in heritage reflecting the area's long established links with the Arts and Crafts movement. Elevational treatments include original Ironstone features rescued and restored from original buildings on the site.

A QUIET LUXURY

English countryside interiors through a contemporary perspective. A quiet luxury that blends modern lines, soft colours and traditional construction to create a quiet modernity.

MAXIMISING SPACE AND FLOW

Through a carefully considered approach to the layouts, we've maximized the feeling of space, creating free-flowing movement through each home.

THE SITE

From the grand entrance gates, the estate drive winds gently through established woodland, opening out to the central grassland areas, the focal point of which is an enchanting natural pond bursting with water lilies, wild grasses and irises.

A majestic Monkey Puzzle tree sits at the highest point of the estate with a hilltop panorama taking in the wildlife lake which forms part of plot 2 and the far reaching views beyond.

The five houses sit within plots ranging from two to nine acres, each with its own private, gated entrance. Their position and orientation makes use of the natural barriers created by the surrounding landscape, enhancing privacy between plots.

The mix of existing woodland and grassland provides a unique and sustainable landscape to support the ecological and biodiversity of the estate. Additional planting will be added to enhance visual impact and to provide a natural buffer between the public and private spaces.
