- Consistent Rental Income Secured Throughout Current Ownership

£68,536 Secured Annual Income – Residential Investment Portfolio, Bangor

An opportunity to acquire five well-presented, uniform two-bedroom flats within a single building in Bangor, Gwynedd, offered as a single investment lot with occupants in situ. Providing a 7.6% NET yield after overheads which include service charges and management fees. Opportunity to generate an 8% NET yield for future years.

The portfolio generates a combined gross rental income of £68,536 per annum, fully secured for the 2026/27 academic year, delivering immediate and dependable cash flow from day one.

Arranged as non-HMO, leasehold flats, each unit is let on a per-property basis, removing licensing requirements and ensuring straightforward, low-intensity management. The asset benefits from a proven 10-year letting track record, consistent student demand, and an established management structure.

This is a highly efficient, income-producing investment with a simple, repeatable rental model and strong yield potential compared to London and South East markets. The standardised configuration also provides long-term flexibility across student, sharer, or private rental markets.

Ideally suited to investors seeking secure income, operational simplicity, and regional yield diversification.
