Tucked away in a private position within the popular village of Witheridge, this individually built four-bedroom detached home offers generous accommodation, striking architectural features and a beautifully enclosed stone-walled garden.

The property has been thoughtfully designed to create a wonderful sense of space and natural light, with modern construction, high levels of insulation and underfloor heating throughout, supplied by an air source heat pump.

An entrance porch leads into the impressive main living room, a particularly spacious, triple-aspect room with wood-effect flooring and wide glazed doors opening directly onto the rear garden.

There is ample space for both sitting and dining furniture, while a broad open archway connects the room to the equally generous kitchen.

The fitted kitchen includes a double oven, hob and extractor, with plenty of room for an informal dining area or comfortable snug.

Dual-aspect windows and a separate garden door add to the light and practical layout.

A spacious ground-floor cloakroom completes the accommodation on this level.

One of the property's most distinctive features is the beautifully designed staircase, rising alongside two impressive full-height windows that flood the entrance and first-floor landing with natural light.

The staircase opens onto a gallery-style landing, leading to four bedrooms, including three doubles, one with an en-suite shower room, together with a family bathroom.

Outside, a substantial paved driveway provides parking for several vehicles and access to the garage.

The enclosed rear garden is mainly laid to lawn, with patio areas and attractive natural stone boundary walls creating a particularly private setting.

Witheridge offers a welcoming village community, local shops, public houses, places to eat and a doctors' surgery, while Tiverton and South Molton provide a wider range of facilities within easy driving distance.

Utilities
Mains electric, water, and drainage. Underfloor heating on on the ground, and first floor, provided by an air source heat pump.
