About the property

What the owner loves:

When we first visited the flat, we were instantly drawn to the many windows, the amount of light they bring into the flat, the high ceilings, space and open feeling and the quality of everything. We were the first to own the flat after it had been built, the building itself had previously been an office space. The standard of finish and quality of the details really stood out to us, especially after having viewed lots of other new build flats. It was also hugely appealing as something different to anything else we had seen with the giant curve in the main room.

We are south facing, so sun and light all day, during the winter and with the lower sun, this warms up the flat beautifully (regularly reaches 25 degrees without the heating on!). Fortunately, there is an awning outside above the windows, so during the summer months with the sun high in the sky, we get very minimal direct sunlight meaning the flat doesn't become unbearably hot, especially as there are so many windows that can be opened.
