## EPC

| Energy Efficiency Rating                    |                         | Current | Potential |
|---|-------------------------|---------|-----------|
| Very energy efficient - lower running costs |                         |         |           |
| (92 plus) A                                 |                         |         |           |
| (81-91) B                                   |                         |         |           |
| (69-80) C                                   |                         |         |           |
| (55-68) D                                   |                         | 68      | 78        |
| (39-54) E                                   |                         |         |           |
| (21-38) F                                   |                         |         |           |
| (1-20) G                                    |                         |         |           |
| Not energy efficient - higher running costs |                         |         |           |
| <b>England &amp; Wales</b>                  | EU Directive 2002/91/EC |         |           |

The Energy Performance Certificate (EPC) shows a property's energy efficiency and carbon emissions impact on a scale from 'A' to 'G', where 'A' is most efficient and 'G' least efficient. Better efficiency means lower energy costs. The EPC shows both the properties' current efficiency rating and its potential rating if all possible improvements were made.
