THE DEVELOPMENT

MEDITERRANEAN WELLBEING BETWEEN GOLF AND THE SEA

This carefully designed residential complex in Casares-Costa brings together 2 and 3 bedroom homes from €428,000, all with parking and a storage room. Ground-floor homes with gardens and penthouses with generous terraces have been designed down to the last detail to enjoy unobstructed views of the sea and the green landscape surrounding the complex, in a setting where nature takes centre stage.

Casares-Costa is one of the most authentic and best preserved corners of the Costa del Sol. Surrounded by golf courses and a stone's throw from the beaches, the area offers the calm of a privileged natural setting with the convenience of being perfectly connected to Estepona, Marbella, Sotogrande and the rest of the coast.

Here life unfolds unhurried, between golf, the sea and the enviable southern climate.

The homes come in different layouts — ground floors with gardens, middle floors and penthouses — with built areas of around 100–123 m² and penthouses of approximately 117–119 m². Every space has been designed to make the most of the light and the views, with large terraces that extend the living room outdoors and turn every day into a Mediterranean experience.

The 3 bedroom penthouses are designed for maximum comfort and quality of life: large private terraces with a jacuzzi, ideal for relaxing while taking in the landscape, and 2 parking spaces providing convenience and extra room.

Details that make all the difference and elevate the experience of living here.

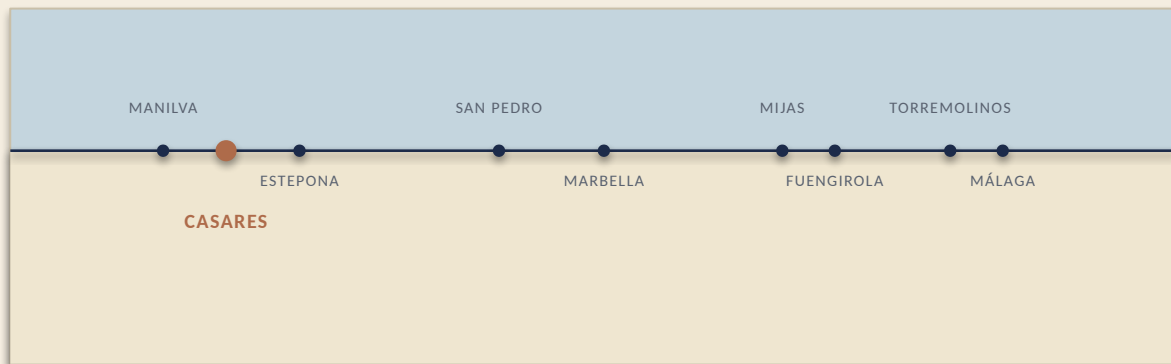

The development offers spaces for everyone: an infinity pool with a beach entrance, a gym, a spa, a zen space, a calisthenics area, a viewpoint with wonderful views over the golf course and the sea, and extensive landscaped gardens that will make you feel you live in the best possible place, all year round.

Casares and its surroundings are enjoying a period of strong growth and rising international demand, making these homes an excellent opportunity both to enjoy and to invest in, with remarkable revaluation potential within the New Golden Mile.
