# Shared ownership explained

---

## What is shared ownership?

Shared ownership is a scheme designed to help people get on the property ladder. It involves purchasing a share in a property and paying a subsidised rent on the remaining share.

Our friendly and professional advisers will offer you expert guidance and ongoing support throughout your shared ownership journey. We'll be by your side as you find the home that's right for you!

## How does shared ownership work?

For this development, you can initially purchase between 10% and 75% of the property.

Later down the line, and as your household income allows, you can choose to buy more shares in your home. This is called staircasing and allows you to increase your ownership up to 100%.

For further detail on shared ownership, take a look at our [shared ownership guide](#) via the link below, along with our [first come first serve policy](#) document.
