## Important Notice:

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto [www.onesurvey.org](http://www.onesurvey.org) (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.**

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

# **SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)**

## **PART 1 - GENERAL**

### **1.1 THE SURVEYORS**

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property.<sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

### **1.2 THE REPORT**

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

---

<sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

### **1.3 LIABILITY**

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### **1.4 GENERIC MORTGAGE VALUATION REPORT**

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### **1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES**

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

#### **1.6 INTELLECTUAL PROPERTY**

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### **1.7 PAYMENT**

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### **1.8 CANCELLATION**

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

## **1.9 PRECEDENCE**

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

## **1.10 DEFINITIONS**

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion*
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

---

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

## **PART 2 – DESCRIPTION OF THE REPORT**

### **2.1 THE SERVICE**

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### **2.2 THE INSPECTION**

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

### **2.3 THE REPORT**

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

2.3.1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

2.3.2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.

2.3.3 Category 1: No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

## 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

## 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

## 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

## 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

*"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an*

*arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.* In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- \*There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- \*There are no particularly troublesome or unusual legal restrictions;
- \*There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

*“Re-instatement cost” is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

## 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a mid terraced villa, two storeys in height.
Accommodation	Ground floor: Entrance vestibule, hall, lounge, dining/sitting room, dining kitchen, utility room and shower room.  Half landing: Upper landing, bedroom 4 and bathroom.  First floor: Upper landing, bedroom 1, bedroom 2 and bedroom 3.
Gross internal floor area (m2)	185m <sup>2</sup>
Neighbourhood and location	The property is situated within a popular and established residential location developed in broadly similar age and style properties, lying to the west of the city. Most normally required facilities and amenities are available within easy reach.
Age	115 years or thereby.
Weather	Dry and sunny.
Chimney stacks	The chimneyheads are of stone and rendered construction, dressed in lead flashings.  Visually inspected with the aid of binoculars where required.

Roofing including roof space	<p>The roof is multi pitched, timber supported and slate clad, topped in zinc ridging, where visible. The main roof space could not be accessed due to health and safety constraints, namely the location of the hatch. An inspection of the small roof space of the rear projection was carried out from a hatch in the rear hallway, revealing a completely floored and lined space. No inspection of the roofing timbers was possible. The ground floor projection roof space was accessed from a hatch in the utility room, again revealing a completely floored and lined space.</p> <p>The vendor advises that thick insulation is present within the main roof space.</p> <p>Sloping roofs were visually inspected with the aid of binoculars where required.</p> <p>Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.</p>
Rainwater fittings	<p>Rainwater discharge is via aluminium, cast iron and uPVC conductors.</p> <p>Visually inspected with the aid of binoculars where required.</p>
Main walls	<p>The main walls of the property are of solid brick construction, red sandstone faced to the front elevation and rendered to the rear, all timber strapped, lathed and plastered or dry lined internally.</p> <p>Fresh air ventilators are present at base course level. It is common in older stone built properties for there to be a slate levelling course which can also act, in part, as a damp proof course. This is normally restricted to the outer walls. Internally there may be a damp proof course consisting of lapped roofing, or similar slate. This type of damp proof course is often of limited value as slates, being rigid, tend to break with any movement of the main structure.</p> <p>The vendor advises that a damp proof course has been installed to the rear.</p> <p>Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.</p>

Windows, external doors and joinery	<p>Windows are the original timber framed, double hung, sash and case design, single glazed units, which have been draught proofed. Secondary glazing is present within the front master bedroom. The shower room has a replacement uPVC framed double glazed unit. Double moulded timber storm doors leading to glazed timber entrance door. uPVC framed double glazed rear door. Traditional timber soffits and fascias.</p> <p>Internal and external doors were opened and closed where keys were available.</p> <p>Random windows were opened and closed where possible.</p> <p>Doors and windows were not forced open.</p>
External decorations	<p>Painted external woodwork and metalwork.</p> <p>Visually inspected.</p>
Conservatories / porches	None.
Communal areas	None.
Garages and permanent outbuildings	None.
Outside areas and boundaries	<p>There are garden grounds to the front and rear, adequately bounded.</p> <p>Visually inspected.</p>
Ceilings	<p>Ceilings throughout the property appear to be of timber strapped, lathed and plastered construction whereby the wet plaster is floated onto a timber framework of lathing fixed to the underside of ceiling joists. Some ceilings may be plasterboard.</p> <p>Visually inspected from floor level.</p>
Internal walls	<p>Internal walls and partitions are of brick construction, hard plastered on both faces. Some are timber framed and lined in plasterboard.</p> <p>Visually inspected from floor level.</p> <p>Using a moisture meter, walls were randomly tested for dampness where considered appropriate.</p>

Floors including sub floors	<p>Flooring throughout the property is of suspended timber design, overlaid in tongue and groove boarding, with the exception of the utility and shower room, which have solid floors, all of which have fully fitted floor coverings.</p> <p>Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.</p> <p>Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point. Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.</p>
Internal joinery and kitchen fittings	<p>Internal joinery comprises timber skirtings, door facings and door surrounds, and timber internal pass doors. Kitchen fittings comprise a range of wall and base units and work surfaces, incorporating a stainless steel sink and drainer, gas hob and integrated appliances.</p> <p>Built-in cupboards were looked into but no stored items were moved.</p> <p>Kitchen units were visually inspected excluding appliances.</p>
Chimney breasts and fireplaces	<p>Within the lounge, there is a gas Living Flame fire. Within the sitting/dining room there is a gas fire. Remaining fireplaces have been sealed and most are vented.</p> <p>Visually inspected. No testing of the flues or fittings was carried out.</p>
Internal decorations	<p>Papered and painted walls and ceilings, and painted woodwork.</p> <p>Visually inspected.</p>
Cellars	None.
Electricity	<p>A mains supply of electricity is connected to the property, the electrical meter and circuit breaker consumer unit located in the vestibule and serving 13 Amp square pin sockets throughout. Wiring, where visible, is sheathed in uPVC.</p> <p>Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.</p> <p>Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.</p>

Gas	<p>A mains supply of gas is connected, the gas meter located externally in a uPVC housing.</p> <p>Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.</p> <p>Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.</p>
Water, plumbing and bathroom fittings	<p>The shower room contains a shower cubicle with mixer shower overhead, wash hand basin and WC. The bathroom contains a bath, separate shower cubicle with electric shower overhead, wash hand basin and WC.</p> <p>Cold water is from the mains supply. Visible plumbing comprises copper and uPVC supply pipework.</p> <p>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.</p> <p>No tests whatsoever were carried out to the system or appliances.</p>
Heating and hot water	<p>The property is centrally heated by means of a gas fired system, comprising a condensing combination boiler located in the utility room. Heating to the rooms is provided by water filled radiators. The system is of a type designed to provide instantaneous hot water upon demand.</p> <p>Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p>
Drainage	<p>Mains drainage is understood to be connected.</p> <p>Drainage covers etc were not lifted.</p> <p>Neither drains nor drainage systems were tested.</p>

<p>Fire, smoke and burglar alarms</p>	<p>The property has a heat detector, carbon monoxide detector and smoke alarms installed. In addition, an intruder alarm system is present.</p> <p>Visually inspected.</p> <p>No test whatsoever were carried out to any systems or appliances.</p> <p>There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required.</p> <p>The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.</p> <p>The vendor advises the system is fully interlinked and compliant. This of course should be confirmed by your legal advisor.</p>
<p>Any additional limits to inspection</p>	<p>The property was inspected within the limits imposed by occupation which included, throughout, closely nailed and fixed fitted carpeting, floor coverings, stored items, furnishings etc. The owner's personal belongings were not removed from cupboards.</p> <p>It will be appreciated that parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.</p> <p>An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive. Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way.</p>

## Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

## 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category:	1
Notes:	<p>The property has incurred with a grave structural movement in the past. This is evidenced externally by cracking to rendering, and internally by plaster cracking, mostly visible within the rear bedroom. The vendor advises that a structural engineer has inspected same and confirmed this to be of a longstanding nature. Plaster repairs and redecoration will be completed prior to sale.</p> <p>On the date of inspection, this movement appeared to be of a longstanding nature with no obvious evidence of recent or continuing deterioration, although on the basis of a single inspection, no assurances can be given as to the future.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Dampness, rot and infestation

Repair category:	1
Notes:	<p>An electronic moisture meter was used to measure levels of dampness, at random locations, to lower wall surfaces and floors, where accessible and without moving furniture or lifting floor coverings, if present. No obvious significant dampness, timber decay or infestation noted, within the limitations imposed on the inspection.</p> <p>The vendor advised that damp proofing works have taken place to the rear. Any guarantees, specifications, etc. should be sought and made available to any incoming purchaser.</p> <p>No removal of internal linings has been carried out in order to ascertain the condition of hidden parts and no warranty can be given regarding areas not specifically referred to in this report.</p> <p>Within any building of this form of construction, there are areas of timber that are concealed. As a result of external conditions, exposure, defects, weathering or lack of maintenance, these timbers may be exposed to conditions conducive to the germination of fungus. These areas, by the nature of their construction, are frequently concealed behind lath and plaster, timber linings, timber panelling, window blinds, etc. Without destructive exploratory work, which is outwith the scope of our inspection, infestation is impossible to detect where there are no signs of rot on the surface.</p>

## Chimney stacks

Repair category:	2
Notes:	<p>Whilst no obvious significant defects were noted, deterioration is evident to stonework at the front, and some cracking has occurred to the rendered finishes to the rear.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Roofing including roof space

Repair category:	2
Notes:	<p>The property is covered with its original slated roof, nearing the end of its performance life, and a number of slates were noted to be loose, missing and/or broken. In the absence of complete stripping and re-covering, this roof structure will be an increasingly frequent source of maintenance expenditure.</p> <p>Within the roof space to the rear, plaster cracking has occurred.</p>

## Rainwater fittings

Repair category:	2
Notes:	<p>It will be appreciated that the inspection was carried out during dry weather conditions. Sometimes defects in rainwater goods are only apparent during, or after heavy rainfall.</p> <p>Gutter joints on the front elevation show signs of leakage.</p> <p>There is vegetation growth visible within the guttering. Choked rainwater units can lead to serious defects in other parts of the building if not repaired timeously.</p>

## Main walls

Repair category:	2
Notes:	<p>The main walls are in reasonable condition allowing for age and weathering, however some patches of eroded stonework are evident in places and some of the mortar joints are defective, but this is considered commensurate with the age and type of property.</p> <p>Deterioration has occurred to rendering to the rear, which, the vendor advises, is to be repaired prior to sale.</p> <p>Nonetheless, further cracking is evident, and the need for cutting back to the bare masonry and rear coating should not be discounted.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Windows, external doors and joinery

Repair category:	2
Notes:	<p>Condensation and black spot mould was noted around window frames, attributable to inadequate heating and ventilation.</p> <p>Weathering and deterioration is evident to eaves timbers.</p> <p>Double glazing can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance repairs should be anticipated as part of an ongoing maintenance programme. Our valuation does assume that the installation of the windows does comply with the necessary regulations at the time of installation.</p> <p>The vendor advises that deterioration to pointing around window openings is to be repaired prior to sale.</p>

## External decorations

Repair category:	1
Notes:	The external paintwork finishes are in reasonable condition but are beginning to deteriorate.

## Conservatories / porches

Repair category:	
Notes:	Not applicable.

## Communal areas

Repair category:	
Notes:	Not applicable.

## Garages and permanent outbuildings

Repair category:	
Notes:	Not applicable.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Outside areas and boundaries	
Repair category:	1
Notes:	<p>Outside areas and boundaries appear adequate for purpose.</p> <p>Some deterioration is evident to the stonework finishes at the front boundary wall.</p> <p>The property is situated close to mature trees. Whilst no obvious physical damage was evident, it should be noted that is not recommended that trees be planted closer to a building than a distance equal to their fully grown height. Tree roots can cause damage to structures and services, particularly in shrinkable soils. The requirement for gutter maintenance in the autumn should also be recognised, along with the risk of storm damage.</p>

Ceilings	
Repair category:	2
Notes:	<p>Plaster cracking and deterioration was noted to ceiling surfaces, consistent with age. As age increases, it is not unusual for the plaster to lose its key with the timber lathing, and such defects are only revealed when decorative surfaces are stripped to allow redecoration to take place. Within the roof void at the utility room, plaster cracking has also occurred.</p>

Internal walls	
Repair category:	1
Notes:	<p>No obvious significant defects were noted to the internal walls and partitions, within the limitations imposed on the inspection.</p> <p>Plaster cracking has occurred, in line with previous comments regarding structural movement.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Floors including sub-floors

Repair category:	1
Notes:	Within the limitations imposed on the inspection, no indications were noted to suggest any serious disrepair. It will however be appreciated that concealed floor timbers cannot be guaranteed to be free from defect.

## Internal joinery and kitchen fittings

Repair category:	1
Notes:	No obvious significant defects were noted to internal joinery or kitchen fittings.

## Chimney breasts and fireplaces

Repair category:	2
Notes:	<p>No obvious significant defects were noted to internal joinery or kitchen fittings.</p> <p>All gas appliances should be tested and thereafter regularly maintained by a Gas Safe registered contractor. The vendor advises that a Gas Safety Certificate is available.</p> <p>In this regard, the gas fire within the rear sitting room is of an older vintage.</p> <p>It is generally regarded as good building practice to keep disused flues permanently vented to prevent condensation damage.</p>

## Internal decorations

Repair category:	1
Notes:	<p>No obvious significant defects were noted to the internal decoration.</p> <p>The artex ceiling finish within the ground floor roof void may contain asbestos fibres. This can only be determined by taking a sample for analysis. Even if the ceiling finish does contain asbestos fibres it is not normally considered to be a health hazard provided it is not disturbed, for example it should not be rubbed down during redecoration.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Cellars	
Repair category:	
Notes:	Not applicable.

Electricity	
Repair category:	2
Notes:	<p>The electrical installation appeared to be in a condition commensurate with age and type with no visual defects being apparent. However, it should be fully appreciated that only the most recently re-wired or constructed properties will comply with current regulations.</p> <p>In this regard, skirting board mounted sockets and older style sockets remain. Further, there is no evidence of any recent test certification.</p> <p>It is recommended good practice that all electrical installations should be checked periodically, approximately every ten years or when a property changes hands. This should be regarded as a routine safety and maintenance check.</p>

Gas	
Repair category:	1
Notes:	<p>No obvious significant defects noted. All gas appliances should be tested and thereafter regularly maintained by a Gas Safe registered contractor. The vendor advises that a Gas Safety Certificate is available.</p>

Water, plumbing and bathroom fittings	
Repair category:	1
Notes:	<p>No obvious significant defects noted to accessible plumbing or sanitary fittings.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Heating and hot water	
Repair category:	1
Notes:	<p>No obvious significant defects were noted to the heating system or hot water system, although these have not been tested.</p> <p>It is recommended good practice that gas boilers are serviced on an annual basis by an appropriately qualified person. The boiler's service history should be checked by referring to the service records. If there is no record of a recent service, the boiler should be checked by an appropriately qualified person.</p>

Drainage	
Repair category:	1
Notes:	No obvious significant defects were noted to the drainage system, within the limitations of the inspection.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

<b>Structural movement</b>	1
<b>Dampness, rot and infestation</b>	1
<b>Chimney stacks</b>	2
<b>Roofing including roof space</b>	2
<b>Rainwater fittings</b>	2
<b>Main walls</b>	2
<b>Windows, external doors and joinery</b>	2

<b>Heating and hot water</b>	1
<b>Drainage</b>	1

## Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

## Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

### 3. ACCESSIBILITY INFORMATION

#### Guidance Notes on Accessibility Information

**Three steps or fewer to a main entrance door of the property:** In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

**Unrestricted parking within 25 metres:** For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground
2. Are there three steps or fewer to a main entrance door of the property?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
3. Is there a lift to the main entrance door of the property?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
4. Are all door openings greater than 750mm?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
5. Is there a toilet on the same level as the living room and kitchen?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
6. Is there a toilet on the same level as a bedroom?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
7. Are all rooms on the same level with no internal steps or stairs?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO

## 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

### Matters for a solicitor or licensed conveyancer

In line with our normal practice, it is specifically assumed that the property and its value are unaffected by any matters which would or should be revealed to a competent Completing Solicitor by a local search and replies to the usual enquiries, or by any statutory notice and planning proposal.

The property is situated within an area of known former mine workings. The valuation assumes that the usual enquiries with the Mining Remediation Authority will reveal nothing adverse.

During the inspection it was noted that alterations have taken place, and in this regard it is assumed that all necessary Local Authority Consents and Certifications have been granted or will be made available. It is, therefore, recommended that this matter be investigated and clarified, in relation to the formation of a ground floor shower room and any associated layout changes.

### Estimated re-instatement cost (£) for insurance purposes

£620,000 (Six Hundred and Twenty Thousand Pounds)

The re-building cost for insurance purposes is for the subject property only and is given solely as a guide, as it is assumed the building as a whole is insured under a single policy. It is recommended that you update this figure regularly to ensure that you have adequate cover or alternatively seek specialist advice from your insurer.

### Valuation (£) and market comments

In its present condition the opinion of valuation for the Outright Ownership interest with vacant possession is £575,000 (Five Hundred and Seventy Five Thousand Pounds Sterling).

# MORTGAGE VALUATION REPORT

---

Includes a market valuation of the property.

## Mortgage Valuation Report

Property:	127 Balshagray Avenue Glasgow G11 7EG	Client: Ms. Joan Forrest  Tenure: Ownership
Date of Inspection:	07/01/2026	Reference: GG/1780/GH/AM

*This report has been prepared as part of the seller's instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising a potential lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.*

### 1.0 LOCATION

The property is situated within a popular and established residential location developed in broadly similar age and style properties, lying to the west of the city. Most normally required facilities and amenities are available within easy reach.

### 2.0 DESCRIPTION 2.1 Age: 115 years or thereby.

The subjects comprise a mid terraced villa, two storeys in height.

### 3.0 CONSTRUCTION

The walls are of solid brick construction, under a pitched and slated roof.

### 4.0 ACCOMMODATION

Ground floor: Entrance vestibule, hall, lounge, dining/sitting room, dining kitchen, utility room and shower room.

Half landing: Upper landing, bedroom 4 and bathroom.

First floor: Upper landing, bedroom 1, bedroom 2 and bedroom 3.

### 5.0 SERVICES (No tests have been applied to any of the services)

<b>Water:</b>	Mains	<b>Electricity:</b>	Mains	<b>Gas:</b>	Mains	<b>Drainage:</b>	Mains
---------------	-------	---------------------	-------	-------------	-------	------------------	-------

**Central Heating:** Gas fired boiler to radiators.

### 6.0 OUTBUILDINGS

**Garage:** None

**Others:** None

7.0	<b>GENERAL CONDITION</b> - <i>A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.</i>				
When inspected within limits imposed by occupation, the general condition of the property appears consistent with its age and type of construction, however some works of repair, maintenance and upgrading are required. This has been reflected in the mortgage valuation.					
The property has been affected by structural movement in the past. This appears to be of a longstanding nature, and the risk of further movement is remote.					
8.0	<b>ESSENTIAL REPAIR WORK</b> <i>(as a condition of any mortgage or, to preserve the condition of the property)</i>				
None noted.					
8.1 Retention recommended:		-			
9.0	<b>ROADS &amp; FOOTPATHS</b>				
Made up and assumed adopted.					
10.0	<b>BUILDINGS INSURANCE (£):</b>	625,000	<b>GROSS EXTERNAL FLOOR AREA</b>	206	<b>Square metres</b>
	<i>This figure is an opinion of an appropriate sum for which the property and substantial outbuildings should be insured against total destruction on a re-instatement basis assuming reconstruction of the property in its existing design and materials. Furnishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during re-construction and no allowance has been made for VAT, other than on professional fees. Further discussions with your insurers is advised.</i>				
11.0	<b>GENERAL REMARKS</b>				
In line with our normal practice, it is specifically assumed that the property and its value are unaffected by any matters which would or should be revealed to a competent Completing Solicitor by a local search and replies to the usual enquiries, or by any statutory notice and planning proposal.					
The property is situated within an area of known former mine workings. The valuation assumes that the usual enquiries with the Mining Remediation Authority will reveal nothing adverse.					
During the inspection it was noted that alterations have taken place, and in this regard it is assumed that all necessary Local Authority Consents and Certifications have been granted or will be made available. It is, therefore, recommended that this matter be investigated and clarified, in relation to the formation of a ground floor shower room and any associated layout changes.					
12.0	<b>VALUATION</b> <i>On the assumption of vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights. It is assumed that all necessary Local Authority consents, which may have been required, have been sought and obtained. No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns then they should ask for a specialist to undertake appropriate tests.</i>				
12.1	<b>Market Value in present condition (£):</b>	<b>£575,000</b>	Five Hundred and Seventy Five Thousand Pounds Sterling

# Energy Performance Certificate (EPC)

# Scotland

Dwellings

127 BALSHAGRAY AVENUE, GLASGOW, G11 7EG

**Dwelling type:** Mid-terrace house  
**Date of assessment:** 07 January 2026  
**Date of certificate:** 07 January 2026  
**Total floor area:** 186 m<sup>2</sup>  
**Primary Energy Indicator:** 244 kWh/m<sup>2</sup>/year

**Reference number:** 0339-1018-4209-1246-5204  
**Type of assessment:** RdSAP, existing dwelling  
**Approved Organisation:** Elmhurst  
**Main heating and fuel:** Boiler and radiators, mains gas

## You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years\*

£8,742

See your recommendations report for more information

Over 3 years you could save\*

£2,241

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

Very energy efficient - lower running costs

Current	Potential
59	72

## Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (59)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Very environmentally friendly - lower CO<sub>2</sub> emissions

Current	Potential
52	66

## Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (52)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Internal wall insulation	£7,500 - £11,000	£1296.00
2 Floor insulation (suspended floor)	£5,000 - £10,000	£513.00
3 Double glazed windows	£4,500 - £6,000	£429.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit [greenerscotland.org](https://www.greenerscotland.org) or contact Home Energy Scotland on 0808 808 2282.

**THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE**

## Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Solid brick, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
Roof	Pitched, 300 mm loft insulation	★★★★★	★★★★★
Floor	Suspended, no insulation (assumed)	—	—
Windows	Some multiple glazing	★☆☆☆☆	★☆☆☆☆
Main heating	Boiler and radiators, mains gas	★★★★★	★★★★★
Main heating controls	Programmer, room thermostat and TRVs	★★★★★	★★★★★
Secondary heating	Room heaters, mains gas	—	—
Hot water	From main system	★★★★★	★★★★★
Lighting	Below average lighting efficiency	★★★★☆☆	★★★★☆☆

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 45 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 8.3 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.5 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

## Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£7,281 over 3 years	£5,031 over 3 years	
Hot water	£1,107 over 3 years	£1,107 over 3 years	
Lighting	£354 over 3 years	£363 over 3 years	
<b>Totals</b>	<b>£8,742</b>	<b>£6,501</b>	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

## Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures	Indicative cost	Typical saving per year	Rating after improvement	
			Energy	Environment
1 Internal wall insulation	£7,500 - £11,000	£432		
2 Floor insulation (suspended floor)	£5,000 - £10,000	£171		
3 Replace single glazed windows with low-E double glazed windows	£4,500 - £6,000	£143		
4 Solar photovoltaic panels, 2.5 kWp	£8,000 - £10,000	£244		

## Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to [www.greenerscotland.org](http://www.greenerscotland.org).

## About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Internal wall insulation

Internal wall insulation involves adding a layer of insulation to the inside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. Further information can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)).

### 2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including [www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation](http://www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation). Building regulations generally apply to this work so it is best to check with your local authority building standards department.

### 3 Double glazed windows

Double glazing is the term given to a system where two panes of glass are made up into a sealed unit. Replacing existing single-glazed windows with double-glazed windows will improve comfort in the home by reducing draughts and cold spots near windows. Double-glazed windows may also reduce noise, improve security and combat problems with condensation. Building regulations apply to this work and planning permission may also be required, so it is best to check with your local authority on what standards need to be met. A building warrant is not required if the windows comply with the current requirements.

### 4 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

## Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

## Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit <https://energysavingtrust.org.uk/energy-at-home> for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	22,847.3	N/A	N/A	N/A
Water heating (kWh per year)	3,879.75			

## About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst ([www.elmhurstenergy.co.uk](http://www.elmhurstenergy.co.uk)), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk) and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:	Mr. Gary Haggarty
Assessor membership number:	EES/016069
Company name/trading name:	Allied Surveyors Scotland Ltd
Address:	24 Herbert Street Glasgow G20 6NB
Phone number:	01413309950

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

## Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk), with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at [www.gov.scot/epc](http://www.gov.scot/epc).

## **Advice and support to improve this property**

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit [greener-scotland.org](https://www.greener-scotland.org) or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.
