SURVEYING THE HIGHLANDS & ISLANDS

Energy Performance Certificate

Energy Performance Certificate (EPC)

Dwellings

Scotland

4 HIGH STREET, INVERGORDON, IV18 0ET

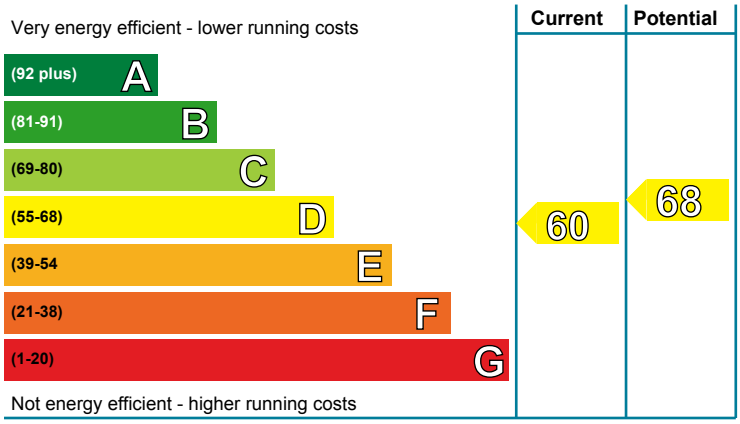

Dwelling type:	End-terrace house	**Reference number:**	9316-9920-4009-0141-7226
Date of assessment:	29 October 2026	**Type of assessment:**	RdSAP, existing dwelling
Date of certificate:	29 October 2026	**Approved Organisation:**	Elmhurst
Total floor area:	117 m²	**Main heating and fuel:**	Boiler and radiators, mains gas
Primary Energy Indicator:	242 kWh/m²/year		

You can use this document to:

- **Compare current ratings of properties to see which are more energy efficient and environmentally friendly**
- **Find out how to save energy and money and also reduce CO_2 emissions by improving your home**

Estimated energy costs for your home for 3 years*	**£6,771**	See your recommendations report for more information
Over 3 years you could save*	**£597**	

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

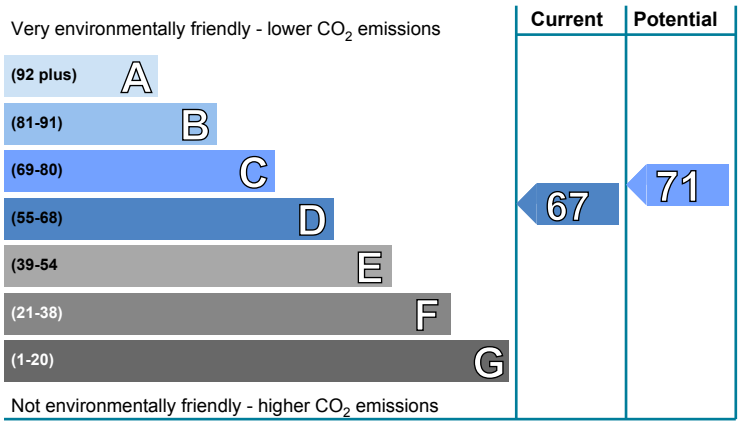

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (60)**. The average rating for EPCs in Scotland is **band D (61).**

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO_2) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (67)**

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Internal wall insulation	£7,500 - £11,000	£408.00
2 Floor insulation (suspended floor)	£5,000 - £10,000	£189.00
3 Solar photovoltaic (PV) panels	£8,000 - £10,000	£672.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
	Timber frame, as built, insulated (assumed)	★★★★☆	★★★★☆
	Cavity wall, as built, insulated (assumed)	★★★★☆	★★★★☆
Roof	(same dwelling above)	—	—
	Pitched, 150 mm loft insulation	★★★★☆	★★★★☆
	Roof room(s), no insulation (assumed)	★☆☆☆☆	★☆☆☆☆
Floor	Suspended, no insulation (assumed)	—	—
	Suspended, limited insulation (assumed)	—	—
Windows	Fully double glazed	★☆☆☆☆	★☆☆☆☆
Main heating	Boiler and radiators, mains gas	★★★★☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	Room heaters, electric	—	—
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Below average lighting efficiency	★★★☆☆	★★★☆☆

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO_2 emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 41 kg $CO_2/m^2/yr$.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 4.8 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 0.6 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£5,643 over 3 years	£5,046 over 3 years	You could save £597 over 3 years
Hot water	£870 over 3 years	£870 over 3 years	
Lighting	£258 over 3 years	£258 over 3 years	
Totals	**£6,771**	**£6,174**	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

	Recommended measures	Indicative cost	Typical saving per year	Rating after improvement	
				Energy	Environment
1	Internal wall insulation	£7,500 - £11,000	£136	D 63	C 69
2	Floor insulation (suspended floor)	£5,000 - £10,000	£63	D 64	C 70
3	Solar photovoltaic panels, 2.5 kWp	£8,000 - £10,000	£224	D 68	C 71

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

energy saving trust

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Internal wall insulation

Internal wall insulation involves adding a layer of insulation to the inside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk).

2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

3 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	19,006.4	N/A	N/A	N/A
Water heating (kWh per year)	1,790.48			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:	Mr. Keith Bowman
Assessor membership number:	EES/008304
Company name/trading name:	Torrance Partnership LLP
Address:	165 High Street Ross-shire Invergordon IV18 0AL
Phone number:	01349 853151
Email address:	admin@torrance-partnership.co.uk
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money.For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

SURVEYING THE HIGHLANDS & ISLANDS

Single Survey

Single Survey

survey report on:

Property address	4 HIGH STREET, INVERGORDON, IV18 0ET

Customer	James Gallie

Customer address	

Prepared by	Torrance Partnership

Date of inspection	29th October 2026

TORRANCE PARTNERSHIP ESTD 1976
SURVEYING THE HIGHLANDS & ISLANDS

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property[1].

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box. ☒

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

[1] Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Codes of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.[2]

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

[2] Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.1 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;

- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;

- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" *is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;*

- the "Property" is the property which forms the subject of the Report;

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.

3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein*

the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" *is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

Single Survey

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The subjects comprise an end terraced traditional 1½ storey dwelling house with single storey extension.
Accommodation	Ground Floor - Entrance hallway, inner hall, living room, kitchen/breakfast area, shower room and sitting room. First Floor - Landing, 2 bedrooms and shower room.
Gross internal floor area (m²)	117.
Neighbourhood and location	The subjects are located on the main High Street of Invergordon and afford ready access to local facilities. The property is set within an area of largely residential properties with some commercial premises and harbour adjacent.
Age	Built circa 1900 with extension circa 1992.
Weather	Dry and overcast. The report should be read in context of these weather conditions.
Chimney stacks	**Visually inspected with the aid of binoculars where appropriate.** 2 No. masonry chimney stacks are provided one of which is shared. These appear of stone construction and are rendered.
Roofing including roof space	**Sloping roofs were visually inspected with the aid of binoculars where appropriate.** **Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.** **Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.**

Roofing including roof space	**If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.** The main roof is assumed to be of timber frame construction finished with natural slate. Box dormer areas are of flat fibre glass. The later extension has a lean to roof with concrete interlocking tiles.

Rainwater fittings	**Visually inspected with the aid of binoculars where appropriate.** The rainwater fittings are of PVC manufacture.

Main walls	**Visually inspected with the aid of binoculars where appropriate.** **Foundations and concealed parts were not exposed or inspected.** The main walls to the property appear of traditional solid sandstone construction with rendered finishes externally. The later extension we assume to be of cavity block construction also finished with render externally.

Windows, external doors and joinery	**Internal and external doors were opened and closed where keys were available.** **Random windows were opened and closed where possible.** **Doors and windows were not forced open.** Windows to the property are largely of double glazed timber casement design. The external entrance door is of single glazed timber casement design with patio doors being of double glazed power coated aluminium design.

External decorations	**Visually inspected.** External decorations largely have paint and stain finishes.

Conservatories / porches	None.

Communal areas	None.

Garages and permanent outbuildings	**Visually inspected.** There is a small timber garage and metal clad shed within the garden grounds. These buildings are deemed sectional/moveable and is therefore outwith the scope of the Home Report.

Outside areas and boundaries	**Visually inspected.** Areas of garden ground are provided to the rear which are bounded by a variety of masonry walls and timber fencing. We understand sections of the garden grounds are bisected by rights of way to the adjoining property for access purposes. We note the external ground level is relatively high in relation to internal finished floor level.

Ceilings	**Visually inspected from floor level.** Of plaster and plasterboard design.

Internal walls	**Visually inspected from floor level.** **Using a moisture meter, walls were randomly tested for dampness where considered appropriate.** Of plaster and plasterboard design.

Floors including sub floors	**Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.** **Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.** **Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.** Flooring spears to be of suspended timber and concrete construction.

Internal joinery and kitchen fittings	**Built-in cupboards were looked into but no stored items were moved.** **Kitchen units were visually inspected excluding appliances.** Internal joinery finishes are consistent for the age and style of property and largely relate to the property's significant refurbishment and renovation works circa 1992.

Chimney breasts and fireplaces	**Visually inspected.** **No testing of the flues or fittings was carried out.** Fireplaces appear to be closed over at present. The main living room is provided with electric fire.

Internal decorations	**Visually inspected.** Internal decorations comprise of paint, wallpaper, varnish and stain finishes consistent for the age and style of property.

Cellars	None.

Electricity	**Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.** Mains supply. Electric switchgear and meter are located under the stairs within the inner hallway.

Gas	**Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.** Mains supply with the meter located in a living room cupboard.

Water, plumbing, bathroom fittings	**Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.** **No tests whatsoever were carried out to the system or appliances.** Mains supply. Where seen the plumbing installation would appear to be of PVC or copper pipework.

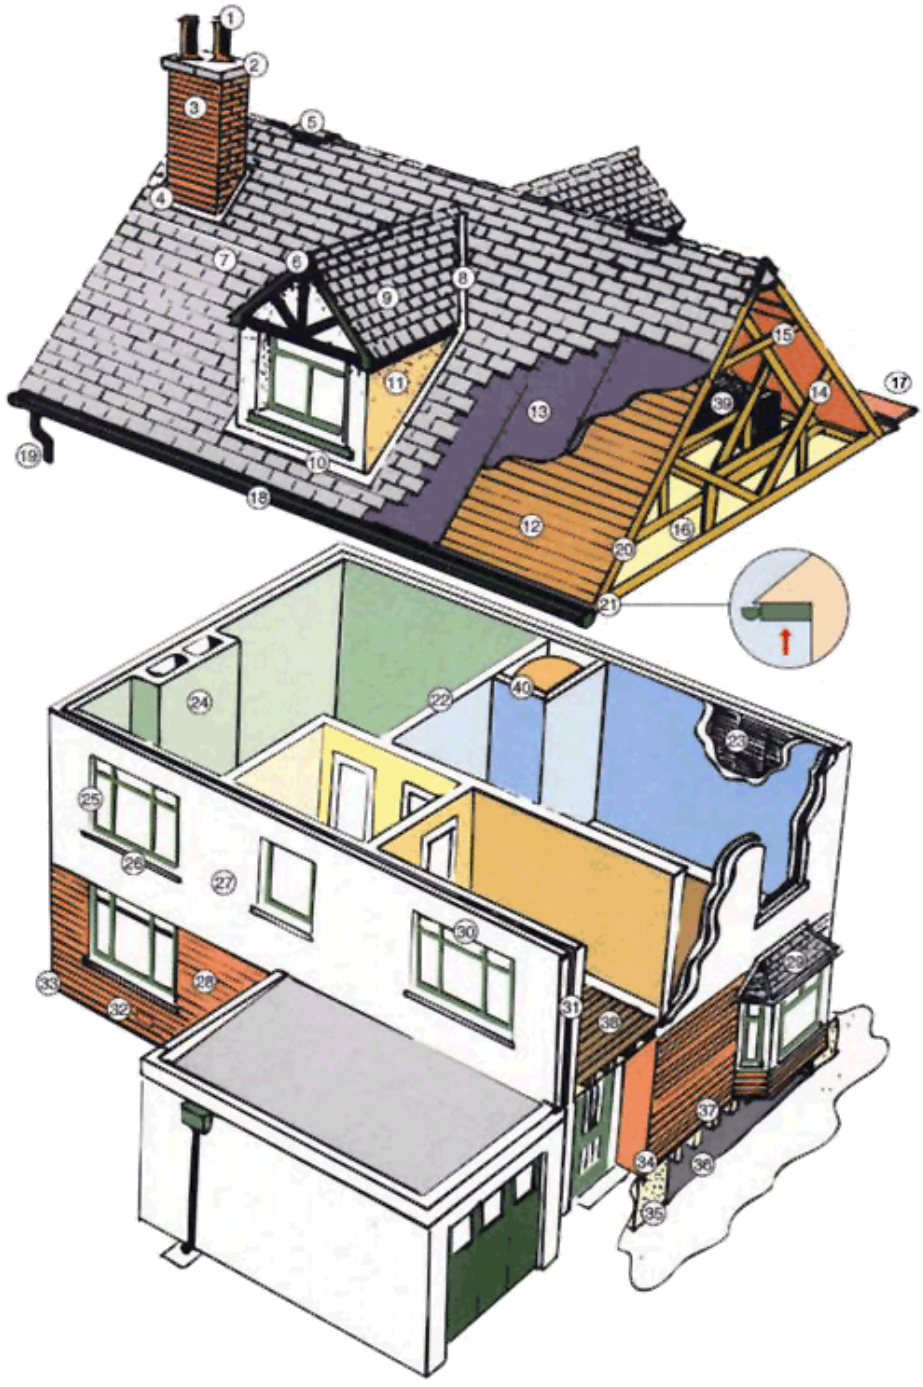

Heating and hot water	**Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.** **No tests whatsoever were carried out to the system or appliances.** Heating is by way of a gas combi boiler located within the first floor landing cupboard. This supplies water filled radiators and also hot water.

Drainage	**Drainage covers etc were not lifted.** **Neither drains nor drainage systems were tested.** Connected to the public sewer.

Fire, smoke and burglar alarms	**Visually inspected.** **No tests whatsoever were carried out to the system or appliances.** Various smoke and heat detection noted. The surveyor will only comment on the presence of smoke detection etc, but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire safety legislation. Fire Safety legislation effective from February 2022 requires a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat detecting alarm must be installed in every kitchen area and all smoke and heat alarms must be ceiling mounted and interlinked. Where there is a carbon- fuelled appliance, e. g. central heating boiler, open fire, wood burning stove, etc. a carbon monoxide detector is also required. The purchaser(s) should appraise themselves of the requirements of this legislation and engage with appropriately accredited contractors to ensure compliance.

Any additional limits to inspection	Access throughout the property was restricted due to floor coverings, furnishings and belongings. Stored items (particularly in cupboards) have not been moved. No access was gained to any sub floor areas. There are no fixed crawl boards to the roof space areas. No access was made to any roof space areas. All properties built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns then they should ask a specialist to undertake an appropriate test. We have not made checks to ascertain whether the property lies within a Radon area. Further advice could be sought from UK Radon. We have not been able to ascertain whether safety glass has been installed to glazing where required. No checks have been made with regard to flood risk. We have not carried out an inspection for Japanese Knotweed or other invasive plant species and unless otherwise stated for the purposes of this report we have assumed that there is no Japanese Knotweed or other invasive plant species within the boundaries of the property or in neighbouring properties. The identification of Japanese Knotweed or other invasive plant species should be made by a Specialist Contractor.

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category	1
Notes	Evidence of settlement was noted. On the basis of a single visit this is considered to be of longstanding.

Dampness, rot and infestation	
Repair category	1
Notes	Random testing for dampness was undertaken internally with the use of a moisture meter where accessible and considered appropriate. No obvious evidence of significant dampness, rot or wood boring insect infestation. We understand the property was treated around the time of major renovation with a 30 year guarantee which has now expired. Ongoing monitored should be undertaken with regard to woodworm and damp in future.

Chimney stacks	
Repair category	1
Notes	Chimney stacks show signs of normal weathering. All disused flues should be suitably capped and vented.

Roofing including roof space	
Repair category	2
Notes	Roof coverings show signs of normal weathering and wear and tear with a degree of moss / debris build up noted. Chipped, missing and slipped slates/tiles evident. A roofing contractor can provide advice on repairs required. The roof tiles would appear original to the time of construction. Roof tiles were designed with a life expectancy of 50-60 years, however, this may vary due to factors including exposure or surface wear. Further advice could be sought from a roofing contractor.

Roofing including roof space	
Repair category	2
Notes	All roofs may be susceptible to water penetration during extreme weather conditions, which may not be identifiable during normal survey conditions. Periodic inspection and repair are advised. Flat roofs may have restricted life expectance or be prone to sudden failure. Periodic inspection and repairs are advised.

Rainwater fittings	
Repair category	1
Notes	Rainwater goods show signs of normal weathering. Some taping and ad hoc jointing was noted to downpipes. Evidence of staining was also noted to sections of gutter joints. It should be noted that a full assessment of the rainwater fittings can only be made during heavy rainfall.

Main walls	
Repair category	2
Notes	Main walls show signs of normal weathering. Some patching and undulation / bossing (loose) render was noted to external finishes particularly to the main frontage. Ongoing attention and maintenance will be necessary as appropriate.

Windows, external doors and joinery	
Repair category	2
Notes	Windows were noted to be of age showing signs of weathering. Some double glazed units were noted to have failed and are misted. We would point out that we have not tested all windows and doors. Ongoing easing, oiling and replacement of mechanisms as required should be undertaken. We assume replacement windows and/or doors have been installed in line with relevant regulations and guidelines.

External decorations	
Repair category	1
Notes	External decorations show signs of weathering particularly to masonry paint finishes. It should be ensured that all external timbers are adequately protected from weathering.

Conservatories/porches

Repair category	-
Notes	

Communal areas

Repair category	-
Notes	

Garages and permanent outbuildings

Repair category	-
Notes	

Outside areas and boundaries

Repair category	1
Notes	Outside areas and boundaries will require ongoing attention and maintenance in future.

Ceilings

Repair category	1
Notes	No significant defects were apparent.

Internal walls

Repair category	1
Notes	No significant defects were apparent.

Floors including sub-floors

Repair category	1
Notes	No significant defects were apparent.

Floors including sub-floors	
Repair category	1
Notes	It is not unusual to discover areas of past water spillage when floor coverings are removed in kitchen and bathroom compartments, revealing the need for further repair and maintenance work.

Internal joinery and kitchen fittings	
Repair category	1
Notes	Internal joinery and kitchen fittings appear of age. Further upgrading could be considered to personal preference in future. We note one glazed door has cracked glass. We understand this is to be replaced by the current owner in the near future.

Chimney breasts and fireplaces	
Repair category	1
Notes	The fire is currently closed over by an electric fire. It is good practice to have flues routinely checked/swept prior to resumption of use.

Internal decorations	
Repair category	1
Notes	No significant defects were apparent. Internal decorations are generally in fair condition. Minor points noted could be attended to during redecoration in future.

Cellars	
Repair category	-
Notes	

Electricity	
Repair category	2
Notes	The installation is to an older specification with wired fuses in use. It would be prudent for the installation to be fully inspected and upgraded as necessary. The Institution of Engineering and Technology recommends that inspection and testing is undertaken at least every 10 years and on change of occupancy. It should be appreciated that only the most recently constructed or rewired properties will have installations which fully comply with present IET regulations.

Gas	
Repair category	1
Notes	We assume the gas installation has been installed and maintained in line with relevant standards. Periodic inspection and testing of the installation is advised by a suitably qualified contractor.

Water, plumbing and bathroom fittings	
Repair category	1
Notes	Ongoing checks should be made to plumbing fitments and sealants. Failure of seals can result in dampness and decay to adjoining/underlying areas.

Heating and hot water	
Repair category	2
Notes	We assume the heating and hot water appliances have been installed and maintained in line with the manufacturer's guidelines however we understand there are no recent service records available for the boiler system. Further checks should be made prior to resumption of use.

Drainage	
Repair category	1
Notes	No significant defects were apparent.

Single Survey

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Drainage	1

Category 3
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
Category 2
Repairs or replacement requiring future attention, but estimates are still advised.
Category 1
No immediate action or repair is needed.

Remember
The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning
If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:
In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:
For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground & First
2. Are there three steps or fewer to a main entrance door of the property?	Yes [X] No [ ]
3. Is there a lift to the main entrance door of the property?	Yes [ ] No [X]
4. Are all door openings greater than 750mm?	Yes [ ] No [X]
5. Is there a toilet on the same level as the living room and kitchen?	Yes [X] No [ ]
6. Is there a toilet on the same level as a bedroom?	Yes [X] No [ ]
7. Are all rooms on the same level with no internal steps or stairs?	Yes [ ] No [X]
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes [X] No [ ]

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

We assume a clear Property Enquiry Certificate shall be provided in due course and that the property has a clear Title. We further assume that any necessary statutory consents for the property in its current state are in place. If any works did require consent, then it has been assumed they meet the standards required by the Building Regulations or are exempt.

The Solicitor must also ensure that any prospective purchaser fully understands the nature, criteria and basis of a Home Report and in particular what a Home Report is and what it is not (an exhaustive Condition Report) and this should be done before any prospective purchaser makes an offer for this property based on the content of this report. If the Solicitor or purchaser requires any clarification in relation to this, they must contact the surveyor or familiarise themselves with the nature and criteria of this type of report.

It should be checked/confirmed that the tenure is absolute ownership and that there are no unduly onerous conditions or restrictive servitudes contained in the Title.

Advice should be sought with regard to the exact extent of ground pertaining to the subjects.

Where defects or repairs have been identified within this Home Report, regardless of whether reported as category 1, 2 or 3 (please read category definitions), it is always best practice to obtain detailed competitive estimates from reputable contractors or specialists prior to entering into any legally binding contract.

Estimated reinstatement cost for insurance purposes

£575,000

This figure is an opinion of an appropriate sum for which the property and significant outbuildings should be insured against total destruction on a reinstatement basis assuming reconstruction of the property in its existing design and materials. Furnishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during reconstruction and no allowance has been made for VAT, other than on professional fees. Further discussion with your insurers is advised. The figure should be reviewed annually and in the light of any future alterations or additions.

Valuation and market comments

The market value of the property as described in this report is £150,000 (One Hundred and Fifty Thousand Pounds).

This figure assumes vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, Title restrictions or servitude rights.

The property is of a type for which there tends to be a reasonable demand.

Mortgage Valuation Report

General Remarks

The subjects comprise a 1½ storey end terraced dwelling house with later single storey extension. The property is on the main High Street of Invergordon and affords ready access to local facilities. The property has been altered and extended in the past circa 1992. We assume all necessary permissions were obtained for these works as appropriate.

At the time of inspection the property was generally found to be in average condition for one of its age and type. Minor points noted could be attended to during routine maintenance and repairs in future.

Essential Repairs

None.

Estimated cost of essential repairs £ ☐ Retention recommended? ☐ Yes ☐ No Amount £ ☐

SURVEYING THE HIGHLANDS & ISLANDS

Property Questionnaire

Property Questionnaire

Property address	4 HIGH STREET, INVERGORDON, IV18 0ET

Seller(s)	James Gallie

Completion date of property questionnaire	27/10/26

Property Questionnaire

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	**Length of ownership**	
	How long have you owned the property? 3 years	
2.	**Council tax**	
	Which Council Tax band is your property in? (Please circle) **A B (C) D E F G H**	
3.	**Parking**	
	What are the arrangements for parking at your property? **(Please tick all that apply)** • **Garage** ☑ • **Allocated parking space** ☐ • **Driveway** ☐ • **Shared parking** ☐ • **On street** ☑ • **Resident permit** ☐ • **Metered parking** ☐ • **Other (please specify):**	
4.	**Conservation area**	
	Is your property in a designated Conservation Area (i.e. an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	~~**Yes**~~ **/ No /** ~~**Don't know**~~

5.	**Listed buildings**	
	Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?	**~~Yes~~ / No**
6.	**Alterations/additions/extensions**	
a.	**(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?** **If you have answered yes, please describe below the changes which you have made:**	**~~Yes~~ / No**
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work? **If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.** **If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:**	**~~Yes~~ / ~~No~~**
b.	**Have you had replacement windows, doors, patio doors or double glazing installed in your property?** **If you have answered yes, please answer the three questions below:**	**~~Yes~~ / No**
	(i) Were the replacements the same shape and type as the ones you replaced?	**~~Yes~~ / ~~No~~**
	(ii) Did this work involve any changes to the window or door openings?	**~~Yes~~ / ~~No~~**
	(iii) Please describe the changes made to the windows, doors or patio doors (with approximate dates when the work was completed): **Please give any guarantees which you received for this work to your solicitor or estate agent.**	

7.	**Central heating**	
a.	**Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).** **If you have answered yes / partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).** Gas **If you have answered yes, please answer the three questions below:**	**Yes / ~~No~~ / ~~Partial~~**
b.	**When was your central heating system or partial central heating system installed?**	20+ years
c.	**Do you have a maintenance contract for the central heating system?** **If you have answered yes, please give details of the company with which you have a maintenance contract:**	**~~Yes~~ / No**
d.	**When was your maintenance agreement last renewed? (Please provide the month and year).**	
8.	**Energy Performance Certificate**	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	**~~Yes~~ / No**
9.	**Issues that may have affected your property**	
a.	**Has there been any storm, flood, fire or other structural damage to your property while you have owned it?** **If you have answered yes, is the damage the subject of any outstanding insurance claim?**	**~~Yes~~ / No** **~~Yes~~ / ~~No~~**
b.	**Are you aware of the existence of asbestos in your property?** **If you have answered yes, please give details:**	**~~Yes~~ / No**

10.	Services	
a.	**Please tick which services are connected to your property and give details of the supplier:**	
b.	**Is there a septic tank system at your property?** **<u>If you have answered yes</u>, please answer the two questions below:**	**~~Yes~~ / No**
c.	**(i) Do you have appropriate consents for the discharge from your septic tank?**	**~~Yes~~ / ~~No~~ / ~~Don't know~~**
d.	**(ii) Do you have a maintenance contract for your septic tank?** **<u>If you have answered yes</u>, please give details of the company with which you have a maintenance contract:**	**~~Yes~~ / ~~No~~**

Services	Connected	Supplier
Gas / liquid petroleum gas	✓	Scottish Gas
Water mains / private water supply	✓	Scottish Water
Electricity	✓	Scottish Gas
