DETAILS

A delightful rural cottage, now one dwelling but originally believed to have been built as a pair of cottages given the major fireplaces at either end of the current structure and what appears to be an in filled door to the left of the current entrance porch.

The cottage built primarily in stone has rendered first floor elevations and is under a thatched roof and is full of charm and character both of the open fireplaces have original bread ovens, there are exposed ceiling joists and beams and the house has timber frame lead light windows throughout.

The stone built barn, with unusual hipped roof has a pair of threshing barn doors to the south front elevation together with a rear personnel door and originally appears to have had a second floor, it certainly has the height for it. This could be ideal for use as an art studio, workshop or possibly even additional accommodation for the main dwelling, subject to planning.

The grounds included are linear running mainly to the west of the property and have become overgrown over the years although recently cleared and there are a number of fruit trees now exposed. The whole extends to about 0.80 of an acre.
