

Energy performance certificate (EPC)

| | | |
|--|---------------|--|
| 7a, Church Street WOODBIDGE IP12 1DS | Energy rating | Valid until: 22 February 2028 |
| | G | Certificate number: 8706-9120-9329-2927-8283 |

| | |
|------------------|----------------------|
| Property type | Top-floor maisonette |
| Total floor area | 113 square metres |

Rules on letting this property

! You may not be able to let this property

This property has an energy rating of G. It cannot be let, unless an exemption has been registered. You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Properties can be let if they have an energy rating from A to E. You could make changes to [improve this property's energy rating](#).

Energy rating and score

This property's energy rating is G. It has the potential to be E.

[See how to improve this property's energy efficiency](#).

| Score | Energy rating | Current | Potential |
|-------|---------------|---------|-----------|
| 92+ | A | | |
| 81-91 | B | | |
| 69-80 | C | | |
| 55-68 | D | | |
| 39-54 | E | | 52 E |
| 21-38 | F | | |
| 1-20 | G | 14 G | |

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D
the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|----------------------|--|-----------|
| Wall | Solid brick, as built, no insulation (assumed) | Very poor |
| Roof | Pitched, no insulation (assumed) | Very poor |
| Window | Some double glazing | Poor |
| Main heating | Room heaters, electric | Very poor |
| Main heating control | Programmer and appliance thermostats | Good |
| Hot water | Electric immersion, off-peak | Poor |
| Lighting | Low energy lighting in 58% of fixed outlets | Good |
| Floor | (other premises below) | N/A |
| Floor | To external air, no insulation (assumed) | N/A |
| Secondary heating | Room heaters, wood logs | N/A |

Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO₂. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Biomass secondary heating

Primary energy use

The primary energy use for this property per year is 616 kilowatt hours per square metre (kWh/m²).

How this affects your energy bills

An average household would need to spend **£3,156 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £1,628 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2018** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 19,791 kWh per year for heating
 - 2,058 kWh per year for hot water
-

Impact on the environment

This property's environmental impact rating is F. It has the potential to be F.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

An average household produces **6 tonnes of CO₂**

This property produces **9.9 tonnes of CO₂**

This property's potential production **9.0 tonnes of CO₂**

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

| Step | Typical installation cost | Typical yearly saving |
|---|---------------------------|-----------------------|
| 1. Internal wall insulation | £4,000 - £14,000 | £597 |
| 2. Draught proofing | £80 - £120 | £28 |
| 3. High heat retention storage heaters | £2,000 - £3,000 | £950 |
| 4. Replace single glazed windows with low-E double glazed windows | £3,300 - £6,500 | £53 |

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| | |
|-----------------|--|
| Assessor's name | David Mortimer |
| Telephone | 07771 591532 |
| Email | davidepc@hotmail.co.uk |

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| | |
|----------------------|--|
| Accreditation scheme | Quidos Limited |
| Assessor's ID | QUID201546 |
| Telephone | 01225 667 570 |
| Email | info@quidos.co.uk |
